

Uses of Hemp

- It takes 10+ years for trees to be used industrially, while hemp takes 120 days.
- 1 acre of hemp produces as much fiber as 2-3 acres of cotton, and as much paper as 2-4 acres of trees.

- Hemp Paper is more recyclable and lasts hundreds of years without degrading.
- Hemp seed is more nutritious and economical to produce than soybean.
- Hemp is more fire-resistant, 10x stronger, and 6x more flexible than steel.
